Grant access to stored queries 3

Grant access to stored queries

To grant access to stored queries, add the appropriate capability words to the user's operator record.

- QueryAdmin: Grants administrative access to query options and maintenance and the ability to create and modify stored queries.
- query.stored: Enables a user to run stored queries that are assigned to the user (or the user's group).
- query.stored.mod: Enables a user to run and to temporarily modify stored queries that are assigned to the user (or the user's group). The user can't save the modified stored query.
- query.window: Grants access to the Query window.
